

# WEBINAR ON SMART SITE SAFETY SYSTEM

## 「安全智慧工地」系統 網上研討會

Date	15 March 2023 ( Wednesday )
Time	3:00pm – 4:00pm
Format	Webinar (online seminar)
Target	All Industry Stakeholders
Registration Fee	Free of Charge

## About

There has been a huge advancement in smart safety-related technologies in recent years, which can help the construction industry to uplift site safety on various front, and better monitor workers' health, reduce physical stress, and ensure the safety of workers. The costs of site accidents are high, involving not only higher insurance premium and claims, but also intrinsic costs, including loss in morale and productivity, increase in turnover and lost time, etc. In comparison, the costs for adopting Smart Site Safety System (SSSS) are small.

The Government has been actively promoting the application of innovative technologies in construction industry, appealing industry stakeholders to fully utilize innovative technologies to uplift site safety, with a view to nurturing a safer and healthier working environment. Therefore, "Smart Site Safety System" is the topic of this "Life First – Walk the Talk". Besides Development Bureau, Occupational Safety and Health Council and supplier's sharing, our Walk the Talk team has visited a construction site to experience how SSSS could uplift site safety.

## Rundown

Time	Event	Speaker
2:45-3:00 pm	Log-in to Webinar Room
