About “Life First – Walk the Talk”

The Construction Industry Council (CIC) has been actively promoting construction safety across the industry. We arranged relevant webinar immediately after an accident occurred in construction industry, to remind the construction practitioners about the importance of safety at construction sites. With the aim of providing the latest safety information to the industry and preventing accidents, CIC will arrange various webinars regularly and proactively since 2023.

Such series of webinars will be named as “Life First – Walk the Talk”, which is not only for the discussion among the construction practitioners, but also encourage them to strictly follow and implement the relevant site safety measures to prevent accidents. At the beginning, “Fatal Zone Management” will be our first topic of the “Life First – Walk the Talk”. This webinar will be held on 18 Jan 2023 with a view to enhancing the fatal zone safety awareness of the industry stakeholders.
